Safety Instructions

- To use the Phone, please follow the instructions in this user manual.
- Use the power adapter supplied with your phone. Other power adapters may damage the phone.
- This phone is only for indoor use. And also avoid in high humidity, water and some other liquids.
- Do not use the phone during thunderstorms.
- CE
- FCC

WEEE Warning

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and have to collect such WEEE separately.

Cleaning

To clean the device, use an anti-static cloth. Please avoid cleaning liquids as they might

damage the surface or internal electronics of the phone.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Getting Started

Packing List

The package contains the following parts, please check if all the items are not missed:

1. The phone device

2. The footstand

3. Handset

4. Headset cord

5. Power adapter (optional)

6. Ethernet cable

7. Quick installation reference

Phone Installation

1. Attach the Foot stand

2. Connect the Handset and optional Headset

3. Connect the Network and Power

Initialization

After your phone has been powered up, the system boots up and performs the following steps:

Automatic Phone Initialization

The phone finishes the initialization process by loading the saved configuration. The phone LCD screen will display "Booting"

And then show "Initializing" during the initialization.

The IP Phone will upgrade the firmware if there is a new firmware on your server. And the IP Phone will show "Check firmware, please waiting..." after initialization.

**Check firmware
Please wait**

Then IP Phone will show Reboot information:

**Device Reboot
Please wait...**

By default the phone attempts to contact a DHCP server in your network in order to obtain its valid network settings, e.g. IP address, subnet mask, default gateway, DNS server.

Status

You can view the system status of your phone via phone user interface or web user interface. The information of phone status includes: Information(e.g., Model, IP, MAC, Firmware, Hardware), Network(e.g., WAN Type, IP, Mask, LAN Type, Gateway, DNS...)Account (e.g., register status of accounts)

To view the phone status via phone interface:

1. Press Menu Status Information

1. Model: AX-300G
2. IPv4: 192.168.1.224
3. IPv6: 2015:1fc1:1111:1111:f42c:2897:77..
Back

2. Press Menu Status Network

1. IPv4
2. IPv6
3. IP Port Mode: IPv4 & IPv6
Back Enter

3. Press Menu Status Network IPv4

1. WAN: DHCP mode
2. IP: 192.168.1.224
3. Mask: 255.255.252.0
Back

4. Press Menu Status Network IPv6

1. WAN: DHCP mode
2. IP: 2015:1fc1:1111:1111:f42c:2897:7747..
3. Gateway: /64
Back

5. Press Menu Status Accounts (AX-300G support four accounts).

1. 529: Registered
2. Empty: Not Registered
3. Empty: Not Registered
Back

To view the phone status via Web interface:

1. Login webpage (For How to login, please refer to [Web Login](#))
2. View the information of Version, Account and Network.

Restart:
Restart the voip application

Registration

To register via phone interface:

1. Press Menu Settings Advanced setting (default password: **admin**) Accounts.
2. Select the desired account
3. Select Enable for Account active
4. Select the desired profile of the account.
5. Fill the SIP User ID, Authenticate ID
6. Fill the Password and Name (shown on LCD).
7. Press Save to save the configuration.

Note:

If there is a port of sip server, you need to press "1" on the keypad, then you will find the ":".

Additional Information:

When the current input method is ABC/abc/2ab,

Pressing "1", you will find ", . ?;:"

Pressing "0", you will find "< >(){}[]"

Pressing "*", you will find "*/!@\$"

Pressing "#", you will find "#%&*|+"

To register via web interface:

1. Login Web interface and Click Profile Basic.

The screenshot shows the Axtel web interface for configuring a Profile. The 'Basic' tab is active. The 'Profile' dropdown is set to 'Profile 1'. The 'Primary SIP Server' field is filled with '192.168.0.9'. The 'SIP Transport' radio buttons are set to 'UDP'. A 'SaveSet' button is visible at the bottom left.

2. Fill the Primary SIP Server and other profile information.
3. Select the SIP Transport.
4. Click **SaveSet** to save the configuration.
5. Click Account Basic.

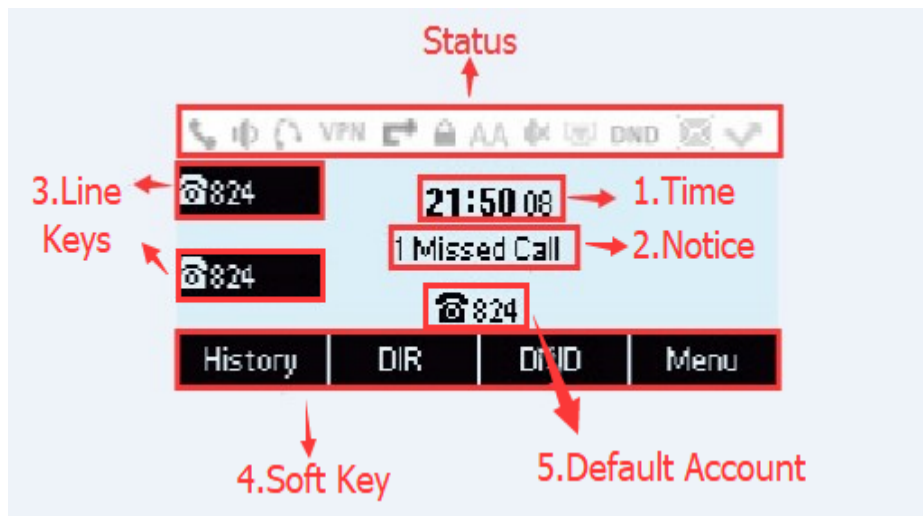

The screenshot shows the Axtel web interface for configuring an Account. The 'Basic' tab is active. The 'Account' dropdown is set to 'Account 1'. The 'Account Status' is 'Registered; UDP'. The 'Account Active' radio buttons are set to 'Yes'. The 'SIP User ID', 'Authenticate ID', and 'Authenticate Password' fields are filled with '+48221882013', '+48221882013', and '.....' respectively. A 'SaveSet' button is visible at the bottom left.

6. Select Yes for Account Active.
7. Select the desired Profile.
8. Fill the SIP User ID, Authenticate ID, Authenticate Password and other account information.
9. Click **SaveSet** to save the configuration.

Note:

1. All fields with *** must be filled. If changed, it requires a phone restart.
2. Account Status says the account registered successfully or not.
3. When change the account information via phone, it will shown Restart note when back to idle page.

Idle Screen

Name	Description
1. Date & Time	It shows the phone's time & date. For Date& time setting, see Time&Date
2. Notice	It shows the phone features status, More see Icon Preview
3. Line Keys	This area shows the four line key labels. Line keys are also can be used as other function keys. For more information you can refer to Line Keys
4. Soft Key	This area shows the soft key labels. The default soft key labels are "History", "Directory", "DND" and "Menu". More to see Programmable Key
5. Default Account	This shows the current use account. User can use   to change the default use account.

Key	Description
Headset Key	When use in headset mode, the led is steady orange or the LED is off.
Message Key	Blinked orange when there is new messages or the LED is off.
Mute Key	White when the mute the call, or the LED is off.

User Interface

There are two ways to customize specific configurations on your IP phone:

- The user interface on the IP phone
- The user interface in a web browser on your PC

The hardware components keypad and LCD screen constitute the phone user interface, which allows the user to execute all call operation tasks and basic configuration changes directly on the phone. In addition, you can use the web user interface to access all configuration settings. In many instances, it is possible to use both the phone user interface and the web user interface to operate the phone and change settings. However, in some instances, it is only possible to use the phone or the web user interface.

Basic Features Configuration

This part will mainly introduce the basic configuration as the Time, Language, and Volume...

General Settings

Web Login

1. Get the IP address: Press Menu Status Information
1. Model: AX-300G
2. IPv4: 192.168.1.224
3. IPv6: 2015:1fc1:1111:1111:f42c:2897:77..
Back
2. Input the IP Address in the web browser.
3. Input the user name (default is **admin**), password (default is **admin**).
4. Login successfully.

Note:

The PC and phone should be in the same segment.

When register the accounts in web and the server port is not "5060", then "SIP Server" should be set as "SIP Server's IP address: server port.", for example, "192.168.0.122: 5090".

Administrator Password

The password is mainly used for login the web interface or set the advanced settings through phone interface. And the default password of the administrator is: **admin**

To change to password via Phone interface

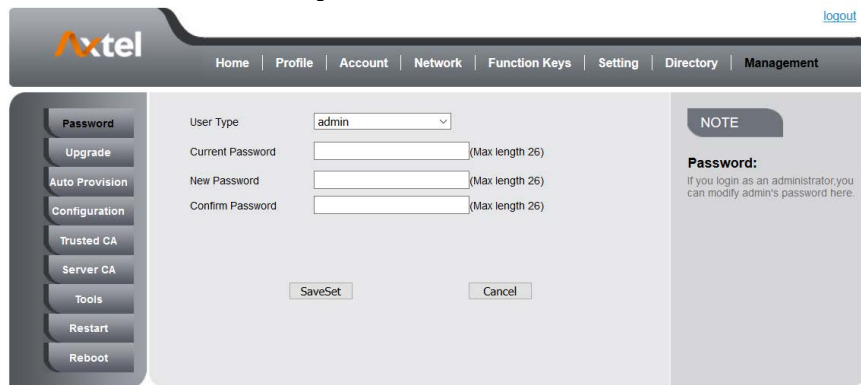

1. Press Menu Settings Advanced Setting password (default admin) Phone Setting Set Password
2. Enter the current PWD (password), new password and confirm the new password.
3. Press Save soft key or  to save the new password.

1. Current PWD: []
2. New PWD: []
3. Confirm: []
Cancel 2aB Delete Save

To change to password via Web interface

1. Management Password
2. Fill the value

- Click  to save the configuration.

Note:
When you use the web interface: user name: admin password: admin(default)

Language

The default Phone interface language is English.

To change the language via Phone interface

- Press Menu Settings Basic Setting Language.
- Press  or Save soft key to save the configuration.

To change the language via Web interface

- Setting Preference Web Language & LCD Language.
- Select the necessary one.
- Press  to save the configuration.

Note:
All languages may not be available for selection. The available languages depend on the language packs currently loaded to the IP phone.

Screen Saver

There are two types of screen saver: Backlight off, Time & Logo.

To enable screen saver via Phone interface

- Press Menu Settings Basic Setting Screensaver...
- Press  and  or press Switch soft key to Choose the Time-out as 1 min or 2/5/10/30 minute, then press the Save button.
- Enter the Screensaver Type to choose one of the type: Logo only, Time & Logo.
- Press  or Save soft key to save the selected configuration.

To disable screen saver via Phone interface

- Press Menu Settings Basic Setting Screensaver...
- Press  and  or press Info/Switch soft key to Choose the Time-out as off.
- Press  or Save soft key to save the selected configuration.

To Enable screen saver via Web interface

1. To Click Setting Preference
2. To choose the Time-out as 1 min or 2/5/10/30 minute.
3. To select the screen Type as Logo only or time & logo.
4. Click SaveSet to save the configuration.

Screen Time Out: 1 min

Text Logo: [Empty field]

ScreenSaver Type: time & logo

To Disable screen saver via Web interface

1. To Click Setting Preference
2. To choose the Time-out as Off
3. Click SaveSet to save the configuration.

Screen Time Out: off

Text Logo: [Empty field]

ScreenSaver Type: time & logo

To custom text logo via Web interface:

1. Click Setting Preference.
2. Choose the Time-out as 1 min or 2/5/10/30 minute.
3. Enter the desired value in the Text Logo field.
4. Click SaveSet to save the configuration.

Screen Time Out: 1 min

Text Logo: Welcome

it will work when screensaver type is time & logo or logo only, and \n represents the newline

To wake up screen saver via Web interface:

1. Click Setting Preference
2. Choose Dial First Digit: Screensaver Wakes up or Screensaver Wakes up and Dial
3. Click **SaveSet** to save the configuration.

Dial First Digit

Screensaver Wakes up

Screensaver Wakes up and Dial

Gray Level

There are 20 levels. you can change the LCD's brightness according to your [visual perception](#)

To change the gray level via Phone interface

1. Press Menu Settings Basic Setting Gray level
2. Press and or press Info/Switch soft key to Choose the level from 1 to 20
3. Press or Save soft key to save the selected configuration

Time and Date

The time and date show on the idle page, and it can be set and change by SNTP server automatically or manual setting.

To configure the time and Date by SNTP setting

1. Press Menu Settings Basic Setting Time & Date SNTP Settings
2. Press or , or Info/Switch soft key to change the Time zone.
3. Fill the NTP server1, NTP Server2, and Daylight Saving.

4. Press  or Save soft key to save the configuration.

To configure time and date manually via Phone interface

1. Press Menu Settings Basic Setting Time & Date Manual
2. Press  and  or change the right time, or you can input the right time.
3. Press  or Save soft key to save the configuration.

To configure the Time & Date Format

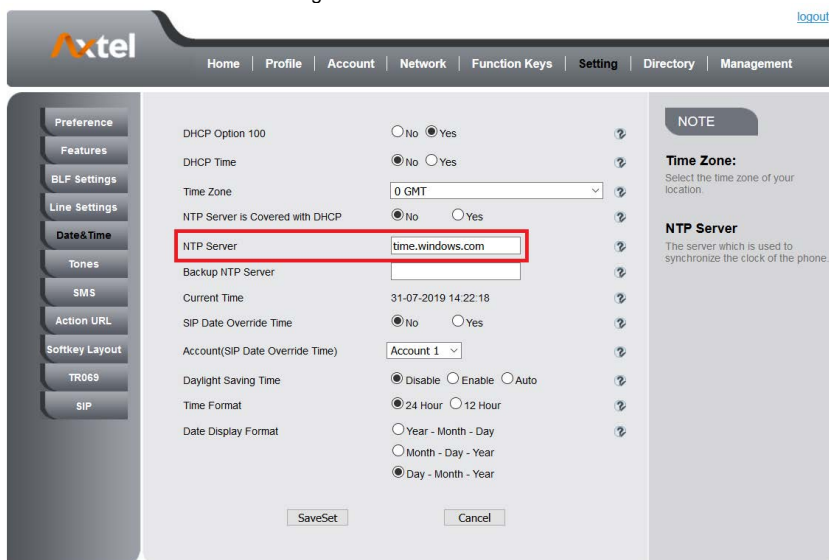

1. Press Menu Settings Basic Setting Time & Date Format
2. Press  and  or press Info/Switch to change between 12 Hour or 24 Hour.
3. Press  and  or press Info/Switch to change among Y-M-D(year-month-day), M-D-Y(month-day-year), D-M-Y(day-month-year).
4. Press  or Save soft key to save the configuration.

To configure the DHCP time

1. Press Menu Settings Basic Setting DHCP time
2. Press  and  or press Info/Switch to change between Disable and Enable.
3. Press  or Save soft key to save the configuration.

To configure the NTP Server by web interface

1. Login
Login name: admin, password: admin (default)
2. Setting Date &Time NTP Server
3. Fill the value in the blank.
4. Click  to save the configuration.

To change the Time Zone and Date Display Format via Web interface

1. Setting Date &Time
2. Select the necessary one.

3. Press **SaveSet** to save the configuration.

To change the Account via Web interface

1. Setting Date &Time Account.
2. Select desired Account.

- Click **SaveSet** to save the configuration.

The screenshot shows the Axtel web interface with the 'Date & Time' settings page. The 'Account(SIP Date Override Time)' dropdown menu is highlighted with a red box and set to 'Account 1'. The 'SaveSet' button is visible at the bottom.

To change the Daylight Saving Time via Web interface

- Setting Date & Time Daylight Saving Time
- Select Disable or Enable or Auto for Daylight Saving Time.

- Click **SaveSet** to save the configuration.

The screenshot shows the Axtel web interface with the 'Date & Time' settings page. The 'Daylight Saving Time' radio buttons are highlighted with a red box, showing 'Disable', 'Enable', and 'Auto' options. The 'SaveSet' button is visible at the bottom.

Note:

If the IP Phone cannot obtain the time and date from the Simple Network Time Protocol (SNTP) server, please contact your system administrator for more information.

Daylight Saving Time

Daylight Saving Time (DST) is the practice of temporary advancing clocks during the summertime so that evenings have more daylight and mornings have less. Typically, clocks are adjusted forward one hour at the start of spring and backward in autumn. Many countries have used the DST at various times, details vary by location. The DST can be adjusted automatically from the time zone configuration. Typically, there is no need to change this setting.

LED Status Setting

The LED Status setting mainly defines the power indicator LED.

To configure LED Status via Web interface:

- Click Setting Preference
- Select Yes or No for Power Status, Ringing Status, Miss Calls Status and Voice Message Status.

- Click **SaveSet** for the setting.

For the LED status description, see: LED Instruction [Power Indicator LED](#)

LED Status Setting:

Ringing Status	<input checked="" type="radio"/> Yes	<input type="radio"/> No
MissCalls Status	<input type="radio"/> Yes	<input checked="" type="radio"/> No
Voice Message Status	<input type="radio"/> Yes	<input checked="" type="radio"/> No

Key as Send

To configure Key as Send

1. Press Menu Features Key as Send
2. Press  and  or press Info/Switch soft key to select the enable choice.
3. Press  or Save soft key to save the configuration

To cancel # Key as Send

1. Press Menu Features Key as Send
2. Press  and  or press Info/Switch soft key to select the disable choice.
3. Press  or Save soft key to save the configuration.

Network Setting

Axtel IP Phone supports IPv4, IPv6, IPv4&IPv6. They have three mode of Network: DHCP, Static, and PPPoE. The default mode is DHCP, it will obtain IP address and other information automatically.

If your phone cannot contact a DHCP server for any reason, you need to configure a static IP address manually.

When switch DHCP, Static IP and PPPoE to each other, or change the Static IP on webpage, it will show the warning of restart as following.

Network settings have been changed, Are you sure reboot the phone to save changes?

OK	Cancel
----	--------

IPv4

If you set IP Mode to IPv4, IP phone will use IPv4 address. IPv4 has three network modes: DHCP, Static, and PPPoE

To configure IPv4 via Phone interface:

1. Press Menu Settings Advanced Setting (password: admin) Network WAN Port IP Port Mode.
2. Press  or  to change the IP Port Mode..
3. Press  or Save soft key to save the configuration.

1.IP Port Mode:IPv4			
2.IPV4			
3.IPV6

IPv4&IPv6

If you set IP Mode to IPv4&IPv6, IP phone will support both IPv4 and IPv6 address. The settings of DHCP, Static, and PPPoE are same as above.

To configure IPv4&IPv6 via Phone interface:

1. Press Menu Settings Advanced Setting (password: admin) Network WAN Port IP Port Mode.
2. Press  or  to change the IP Port Mode..
3. Press  or Save soft key to save the configuration.

To configure IPv4&IPv6 via Web interface:

1. Click Network Basic Internet Port
2. Select IPv4&IPv6 for Internet Port
3. Click  for the setting.

Note:

Wrong network parameters may result in inaccessibility of your phone and may also have an impact on your network performance. For more information about these parameters, contact your system administrator.

PC Port

Two modes for PC port: bridge and router.

To configure PC Bridge via Phone interface:

1. Press Menu Settings Advanced Setting (password: admin) Network PC Port Bridge mode.
2. Click Save and restart the phone.

To configure PC router via Phone interface:

1. Press Menu Settings Advanced Setting (password: admin) Network PC Port Router mode.
2. Enter the IP, Netmask and DHCP server
3. Click Save and restart the phone.

To configure Bridge via Web interface:

1. Click Network PC Port
2. Select As Bridge.
3. Click  and restart the phone

To configure Router via Web interface:

1. Click Network PC Port
2. Select As Router
3. Fill the IP address and other necessary information.

4. Click  and restart the phone

Contact Settings

This section provides the operating instructions for managing contacts. The topics include:

- Local Directory
- Remote Phonebook
- LDAP
- Search Contact

Local Directory

In the directory, you can add or delete your friends, business partner or anyone others' phone No. so you will not forget their number. Or put some anonymous phone No. in the blacklist to prevent from being disturbed. The local Directory can add up to 1000 contacts.

A. To add contacts list into local directory

To add contacts manually

1. Press Menu DIR Contacts...
2. Press Add soft key

 2.Number:
 3.Mobile Number:
3. Enter the necessary information as Name, Phone number...
4. Press Save soft key or  to add the contacts successfully.

To add contacts from History via Phone interface

1. Press History soft key or press Menu History Local History
2. Press  and  to select the targeted one. (Press  and  switched among the All calls, Dialed calls, Received calls, Missed Calls and Forward Calls).
3. Press Option soft key Add to Contacts
4. Edit the necessary information as Name, Phone number...
5. Press Save soft key or  to add the contacts successfully.

To add contacts via Web interface

1. Click Directory Directory
2. Enter the name, number and some other information.
3. Press **Add** and then press **Save** button.

B: To add contacts into blacklist

To add blacklist manually via Phone interface

1. Press Menu DIR BlackList
2. Press Group soft key.
3. Press Add soft key.
4. Enter the Name and select the Ring Tone.
5. Press Save soft key or  to add the Group successfully.
6. Enter the added Group, then press Add soft key.
7. Enter the necessary information as Name, Phone number...
8. Press Save soft key or  to add the contacts successfully.

To add blacklist from history via Phone interface

1. Press History soft key or press Menu History Local History
2. Press  and  to select the targeted one.
3. Press Option soft key Add to Blacklist
4. Edit the necessary information as Name, Phone number...
5. Press Save soft key or  to add successfully.

To import or export the contact list

You can manage your phone's local directory via phone or web user interface. But you can only import or export the contact list via Web interface.

To import an XML file of contact list via Web interface:

1. Click on Directory Directory
2. Click Choose file to select a contact list file (file format must be .xml) from your local system.
3. Click Import XML to import the contact list.

To export an XML file of contact list via Web interface:

1. Click on Directory Directory
2. Click Export XML to export the contact list.

To import a CSV file of contact list via Web interface:

1. Click on Directory Directory
2. Click Choose file to select a contact list file (file format must be .csv) from your local system.
3. Click Import Csv to import the contact list.

To export a CSV file of contact list via Web interface:

1. Click on Directory Directory
2. Click Export Csv to export the contact list.

Update Time Interval(minutes)

SaveSet Cancel

NOTE

Remote Phone Book:
Use this feature to download the phone's contact list from the server. You must enter the URL of the phonebook file (e.g. <http://servername.phonebook.xml> – may also use https://), and rename the phonebook in the Name field

To check the contacts via Phone interface:

Press Directory Left Button Left Button, and then you can see the item you set, press enter you will find the detail.

For More detail, please refer to: [Remote Phonebook](#).

Note:

Every remote contact only support 1000 contacts.

LDAP Phonebook

When use the LDAP feature, you can get the LDAP Phonebook directly.

To configure LDAP via Web interface:

1. Login Web interface and click Directory LDAP
2. Fill the LDAP Name Filter:
 - a. This parameter specifies the name attributes for LDAP searching. The "%" symbol in the filter stands for the entering string used as the prefix of the filter condition.
 - b. For example (cn=%), when the name prefix of the cn of the contact record matches the search criteria, the record will be displayed on the IP PHONE LCD.
3. Fill LDAP Number Filter:
This parameter specifies the number attributes for LDAP searching.
4. Fill Server Address: Fill the domain name or IP address of the LDAP Server.
For example: 192.168.0.124
5. Port(the port of the LDAP Serve) Base, User Name, Password
6. Max.Hits(1-32000): the maximum number of the search results to be returned by the LDAP server.

7. LDAP Display Name: the display name of the contact record displayed on the LCD screen.

8. Fill the relative value and then click **SaveSet** to save the settings.

Following is the example screenshot for the configuration.

The screenshot shows the Axtel web interface with the following configuration fields:

- LDAP Name Filter: (cn=%)
- LDAP Number Filter: ((telephoneNumber=%
- Server Address: 192.168.0.9**
- Port: 389
- Base: ou=pbx.dc=pbx.dc=com**
- User Name: an=admin,dc=pbx.dc=cc
- Password: [Redacted]
- Max.Hits(1~32000): 32000
- LDAP Name Attributes: [Empty]
- LDAP Number Attributes: [Empty]
- LDAP Display Name: cn
- Search Delay(0~2000ms): [Empty]
- Protocol: Version2 Version3
- LDAP Lookup For Call: On Off
- LDAP Sorting Results: On Off
- LDAP Synchronize Time(0~9999mins): [Empty]

Buttons: SaveSet, Cancel

To Configure LDAP Key

To configure LDAP Key via Web interface:

1. Click Function Keys Line Key choose Line Key 2(for example)
2. Select LDAP in the Type field.
3. Click **SaveSet** to save the configuration.

The screenshot shows the Axtel web interface with the following configuration fields:

- Line Label Length: Default
- Line Page Indicator: Disable
- BLF list MODE: Manually
- line key as cancel: Disable
- BLF blink: Off

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line	Default		Test	Auto	
Key2	LDAP	Default			Account 1	

Buttons: SaveSet, Cancel

To Configure LDAP Key via Phone interface:

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key 2
2. Select LDAP in the Type field
3. Press Save or OK key to save the configuration.

When press the LDAP Key the LCD will display as following:

The LCD display shows the following information:

- navy 1/89
- william
- Filter Prefix: |
- Buttons: Cancel, 2aB, Delete, Option

For More detail, please refer to [LDAP](#).

Search Contact

You can search contact in all contacts, local contacts, remote contacts and LDAP contact.

To search contact in all contacts:

1. Click the Directory soft key on Idle interface.
2. Click the More soft key, then you can see the Search soft key
3. Click the Search soft key, you can enter the desired part of name or part of number.
4. With the search content to match the contact will be automatically displayed on the LCD within 5 seconds.

Luisa

To search contact in Local contacts:

1. Click the Directory soft key on Idle interface.
2. Click the  button and select the Local contacts list.
3. Click the More soft key, then you can see the Search soft key
4. Click the Search soft key, you can enter the desired part of name or part of number.
5. With the search content to match the contact will be automatically displayed on the LCD within 5 seconds.

To search contact in Remote contacts:

1. Click the Directory soft key on Idle interface.
2. Click the  button and select the remote contacts list.
3. Select the desired the remote contact and click Enter soft key.
4. Click the Search soft key, you can enter the desired part of name or part of number.
5. With the search content to match the contact will be automatically displayed on the LCD within 5 seconds.

To search contact in LDAP contacts:

1. Click the LDAP function key.
2. Enter the first character or more of contact's name.
3. Select the desired the remote contact and click Enter soft key.
4. Then IP Phone will display the relevant contacts automatically within Search Delay.

Call History Settings

Call History

This phone maintains call history lists of Dialed Calls, Received Calls, Missed Calls and Forwarded Calls. The call history list supports up to 100 entries in all on phone interface and more than 1500 items. You can check the call history, dial a call, add a contact or delete an entry from the call history list. You should enable the history record feature in advance.

To enable the history record feature via Phone interface:

1. Press Menu Features History Setting
2. Press  and  or Info/Switch soft key to enable History record.
3. Press Save soft key to save the configuration.

1.History Record:On 

To check the call history via Phone interface:

1. Press the History soft key. The LCD screen displays All Calls list.
2. Press Right or Left Key to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.
3. Press to select the desired entry.
4. Press the Option soft key, and then select Detail from the prompt list.
5. The detailed information of the entry appears on the LCD screen.

1.Detail
2.Smart Dial
3.Edit before dial

To delete an entry from the call history list via Phone interface:

1. Press the History soft key.
2. Press Right or Left Key to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.
3. Press UP or DOWN key to select the desired entry.

4. Press the Delete soft key.

To delete all entries from the call history list via Phone interface:

1. Press the History soft key.
2. Press Right or Left Key to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.
3. Press the Option soft key, and then select Delete All from the prompt list.
4. Press the OK soft key.
5. Press the OK soft key to confirm the deleting or the Cancel soft key to cancel.

To check the call history via Web interface:

1. Click Directory Call History
2. Click Dialed List, Missed List, Received List, Forwarded List then you can see the history list.

The screenshot shows the Axtel web interface. At the top, there is a navigation bar with the Axtel logo and links for Home, Profile, Account, Network, Function Keys, Setting, Directory, and Management. A 'logout' link is also present in the top right corner. On the left side, there is a sidebar menu with options: Directory, Remote Phone Book, Call History, LDAP, Network Directory, and MultiCast Paging. The main content area is titled 'Call History' and contains a table with the following data:

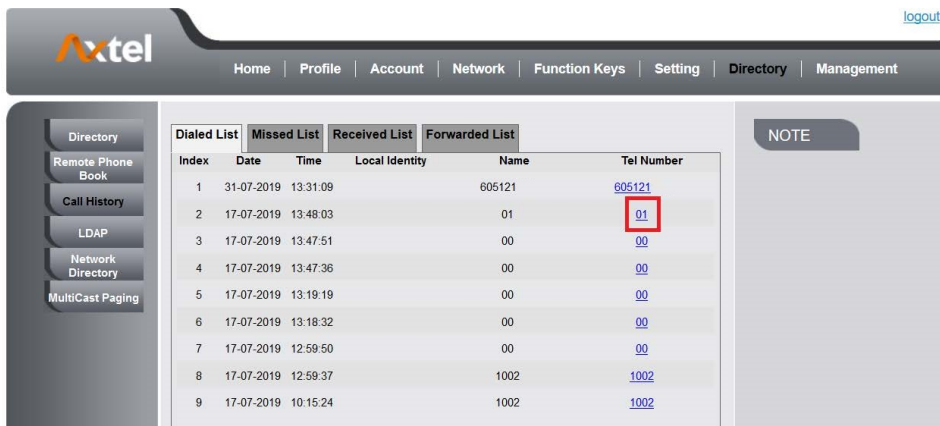

Dialed List					
Index	Date	Time	Local Identity	Name	Tel Number
1	31-07-2019	13:31:09		605121	605121
2	17-07-2019	13:48:03		01	01
3	17-07-2019	13:47:51		00	00
4	17-07-2019	13:47:36		00	00
5	17-07-2019	13:19:19		00	00
6	17-07-2019	13:18:32		00	00
7	17-07-2019	12:59:50		00	00
8	17-07-2019	12:59:37		1002	1002
9	17-07-2019	10:15:24		1002	1002

On the right side of the interface, there is a 'NOTE' section.

To dial a call from Call History via Web interface:

1. Click Directory Call History
2. Select the desired history item, and click Tel Number.

3. Then the call is dialed on phone.

To Dial a call from Call History via Phone interface:

1. Press History soft key or press Menu History Local History
2. Press and to select the targeted one.
3. Press the Send soft key, or , or , or the corresponding line key.

Audio settings

Ring Tone

You can adjust the type and volume of the ring tone.

To adjust the Ring Tone Type via Phone interface

1. Press Menu Settings Basic Setting Ring Tone.
2. Press and to select the aimed one.
3. Press or Save soft key to save the configuration.

To adjust the Ring Tone Type via Web interface

1. Setting Preference Ring Tone
2. Select the wanted one
3. Click to save the configuration.

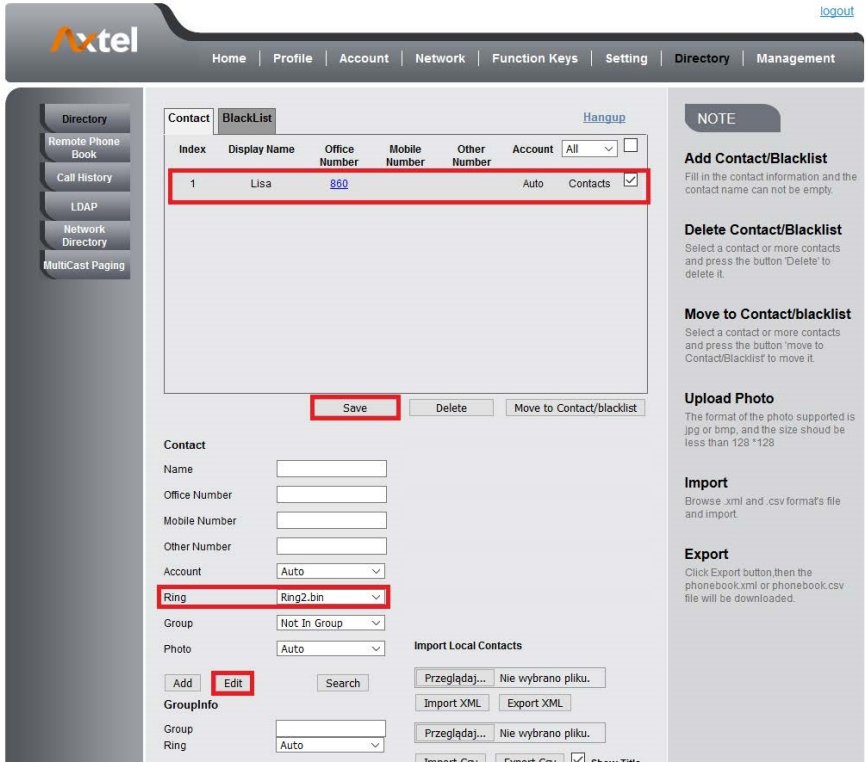

To configure Distinctive Ring Tone via Phone interface

1. Press Directory
2. Select the target contact
3. Press Detail soft key to edit the contact.
4. Press and to select the wanted Ring Tone for the contact
5. Press Save soft key to save the contact.

To configure Distinctive Ring Tone via Web interface

1. Directory > Directory > Contact
2. Choose the Ring Tone you want to use.
3. Click **Edit** **Save** to save the configuration.

Volume

You can adjust the volume for the phone by the volume keys: and . **To adjust the Ring tone volume via Phone interface**

1. Option 1: Press and on the idle page

2. Option 2: Press and during the call is ringing.

To adjust the handset volume via Phone interface

Press and during a call in handset mode.

To adjust the headset volume via Phone interface

Press and during a call in headset mode.

To adjust the speaker Volume via Phone interface

Press  and  during a call in speaker mode.

Voice Mail Tone

This option can set whether to play the beep for phone's voice mail

1. Click the Setting Preference
2. Select On or Off for Voice Mail Tone.
3. Click  for the setting.

Play Hold Tone

When you hold the phone, Whether to play hold tone

1. Click the Setting Preference
2. Set On or Off for Play Hold Tone.
3. Click  for the setting.

When you hold the phone. How many seconds to play beep?

1. Click the Setting Preference
2. Set Enable or Disable for Play Hold Tone Delay.
3. Click  for the setting.

System Settings

Dial Plan

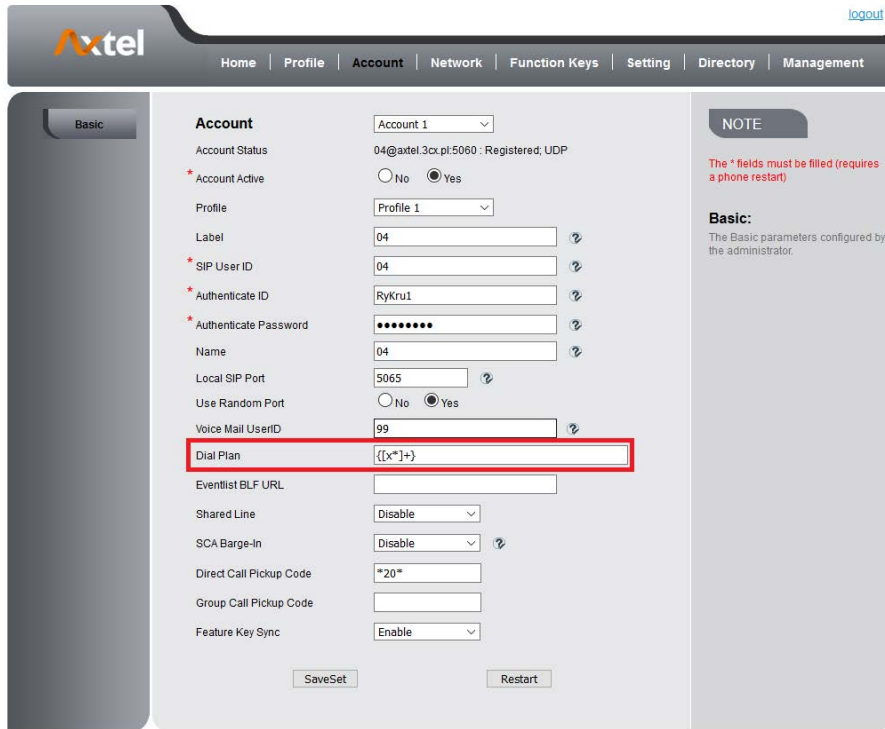

Dial plan is a string of characters that governs the way this phone processes the inputs received from your phone keypad. This phone supports dial plan with following accept digits:

1,2,3,4,5,6,7,8,9,0,*,#

Grammer	Description
x	any digit from 0-9;
xx+	at least 2 digit number;
^	exclude;
,	hear dial tone;
[3-5]	any digit of 3, 4, or 5;
[147]	any digit 1, 4, or 7;
<2=011>	replace digit 2 with 011 when dialing.

To configure dial plan via Web interface:

1. Click Account Basic Dial Plan.
2. Fill the value in dial plan field.
3. Click  to save the configuration.

Note:
Illegal input will fall back to default: `{[x*]+}`. For More, please refer to [Dial Plan](#).

Dial-Now Timeout

Dial-Now Timeout means that when you enter the number which matching with dial plan, it will dial out automatically after some time when you stop enter the number.

To configure Dial-Now Timeout via Web interface:

1. Click Webpage Setting Preference
2. Fill the blank of Dial-Now Timeout: for example 5(seconds).(0 means dial out immediately).
3. Click the  button to save the configuration

No Key Entry Timeout

No Key Entry Timeout means that when you enter the number, it will dial out automatically after some time when you stop enter the number.

To configure No Key Entry Timeout

1. Click Webpage Setting Preference
2. Fill the blank of No Key Entry Timeout: for example 5(seconds).(0 means never timeout, you should press the send key the dial out the number).
3. Click the  button to save the configuration.

Emergency Call

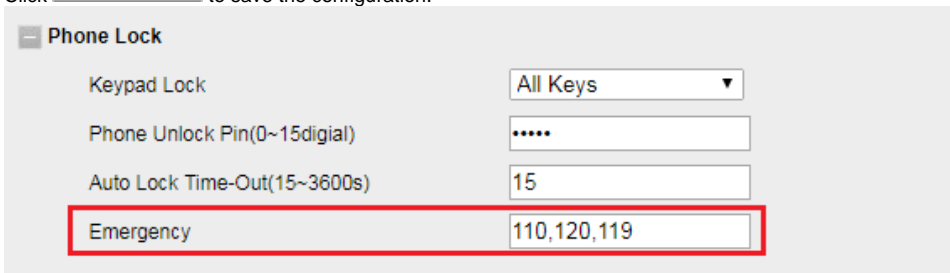

Public telephone networks in countries around the world have a single emergency telephone number (emergency services number), that allows a caller to contact local emergency services for assistance when required. The emergency telephone number may differ from country to country. It is typically a three-digit number so that it can be easily remembered and dialed quickly. Some countries have a different emergency number for each of the different

emergency services.

You can specify the emergency telephone numbers on the IP phone for contacting the emergency services in an emergency situation.

To configure emergency call via Web interface:

1. Click Setting Features Phone Lock
2. Enter the emergency services number in the Emergency field
3. Click  to save the configuration.

Key2	Intercom	Default	*5527		Account 1	

If you want to achieve the intercom feature, you must enable the "Allow Auto Answer By Call-Info"

1. Click Profile
2. Select the desired profile from the pull-down list of Profile in the Profile field.
3. Click Advanced
4. Enable the "Allow Auto Answer By Call-Info"
5. Click the  button to save the configuration.

The screenshot shows the 'Advanced' settings for a profile. The 'Allow Auto Answer By Call-Info' option is highlighted with a red border and has the 'Yes' radio button selected.

Auto Answer No Yes

Allow Auto Answer By Call-Info No Yes

Turn off Speaker on remote No Yes

disconnect

Intercom Barge

If this option is enabled, when there is an active call and an incoming intercom call arrives, the previous call will be put on hold and the intercom call will be answered

1. Click the Setting Preference
2. Set On or Off for Intercom Barge.
3. Click  for the setting.

Note:

This feature is not available on all servers. For more information, contact your system administrator.

DTMF

When the key is configured as DTMF key, you are allowed to send out the desired DTMF number during the conversation. To use this feature, you should sure that the DTMF Tone is on.

To configure the DTMF via Web interface

1. Click Setting Preference
2. Select On for Keypad DTMF Tone.
3. Click the  button to save the configuration.

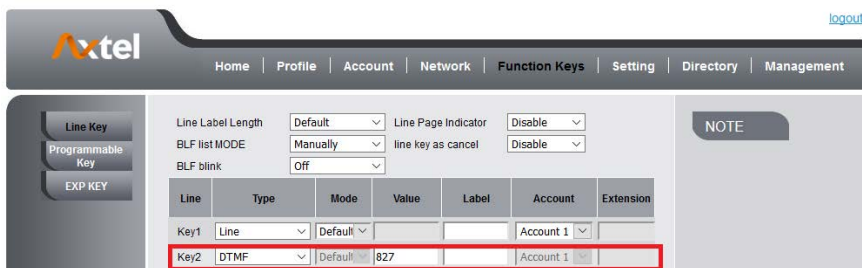

To configure the DTMF via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  key to select the DTMF in the Type field.
3. Enter the value with the Desired DTMF number
4. Press  or Save soft key to save the configuration

To configure the DTMF via Web interface

1. Click Function keys Line Key.
2. Select the desired Line Key and select DTMF in the Type.
3. Fill the value with the Desired DTMF number.
4. Click the  button to save the configuration.

Prefix

If the key is configured as Prefix key, you can set the number prefix (e.g. Before the number plus 9), then you don't input 9, press the key and 9 will display on the LCD interface.

To configure the Prefix via Phone interface

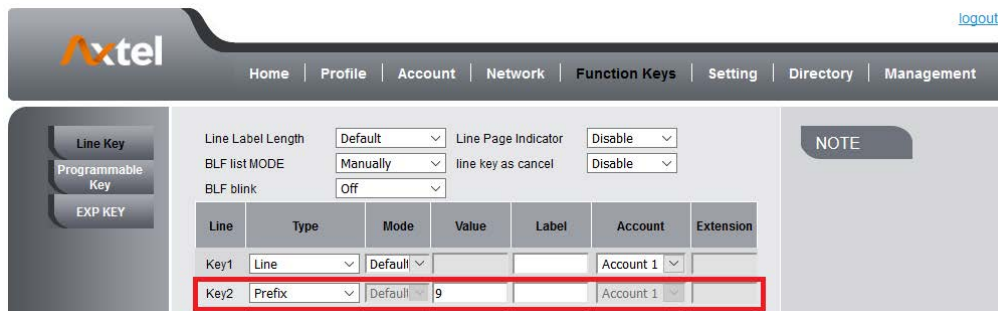

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  key to select the Prefix in the Type field.
3. Enter the value with number that you want to set as prefix
4. Press  or Save soft key to save the configuration

To configure the Prefix via Web interface

1. Click Function keys Line Key.
2. Select the desired Line Key and select Prefix in the Type.
3. Fill the value.

- Click the  button to save the configuration.

Then when you press this key, the set value is input directly.

The screenshot shows the Axtel web interface with the 'Function Keys' menu selected. The 'Line Key' configuration page is displayed. The 'Line Key2' row in the table is highlighted with a red box. The 'Type' dropdown is set to 'Prefix' and the 'Value' field contains '9'. The 'SaveSet' button is highlighted in the top right corner.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line	Default			Account 1	
Key2	Prefix	Default	9		Account 1	

Local Group

When use the Local Group feature, press the key and enter the local Contacts interface quickly.

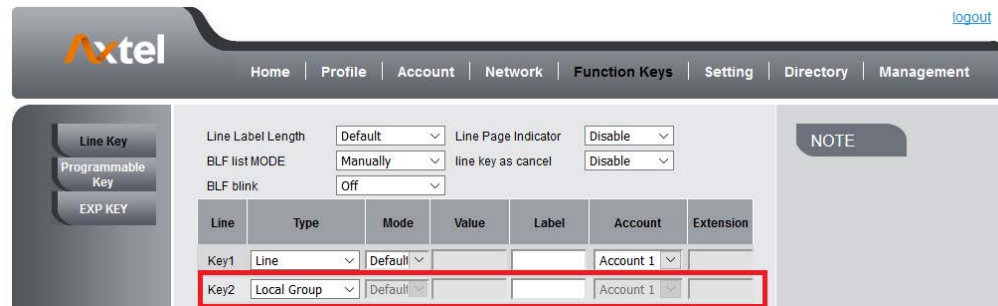

To configure the Local Group via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  key to select the Local Group in the Type field.
- Press  or Save soft key to save the configuration

To configure the Local Group via Web interface

- Click Function keys Line Key.
- Select the desired Key and select Local Group in the Type.
- Click the  button to save the configuration.

Then you can press the Local Group key to access the pre-defined contact group in the local directory quickly.

The screenshot shows the Axtel web interface with the 'Function Keys' menu selected. The 'Line Key' configuration page is displayed. The 'Line Key2' row in the table is highlighted with a red box. The 'Type' dropdown is set to 'Local Group'. The 'SaveSet' button is highlighted in the top right corner.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line	Default			Account 1	
Key2	Local Group	Default			Account 1	

XML Group

When use the XML Group feature, press the key and enter the Remote Contacts interface quickly.

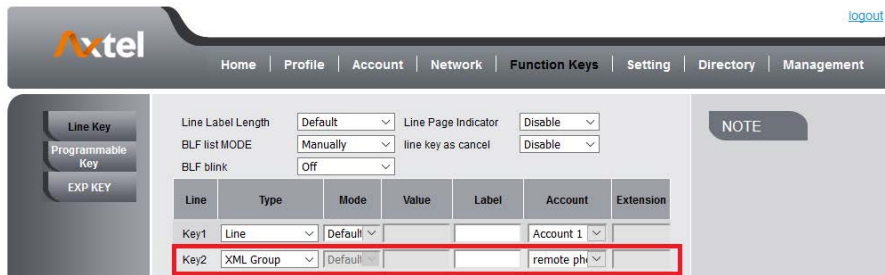

To configure the XML Group via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  key to select the XML Group in the Type field.
- Press  and  key to select the Account ID.
- Press  or Save soft key to save the configuration

To configure the XML Group via Web interface

- Click Function keys Line Key.
- Select the desired Key and select XML Group in the Type.

- Click the  button to save the configuration.

LDAP

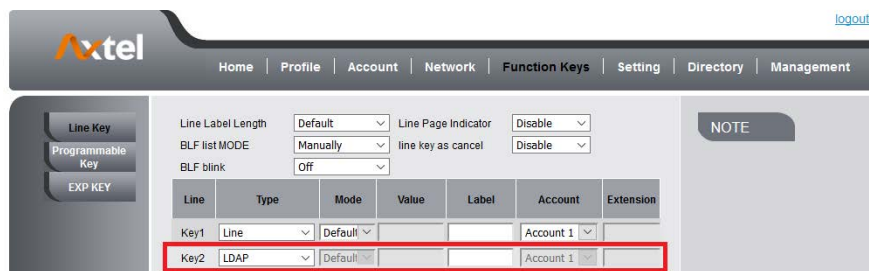

When use the LDAP feature, you can get the LDAP Phonebook directly.

To configure the LDAP via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  key to select the LDAP in the Type field.
- Press  or Save soft key to save the configuration

To configure the LDAP via Web interface

- Click Function keys Line Key.
- Select the desired Key and select LDAP in the Type.
- Click the  button to save the configuration.

XML Browser

You can use this key feature to access the Xml browser quickly. The Xml browser allows you to create custom services which meet your functional requirements on the server. You can customize practical applications, such as weather report, stock information, Google search, etc.

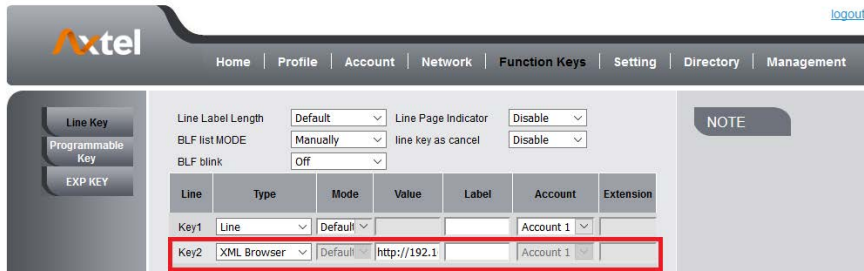

To configure the XML Browser via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  key to select the XML Browser in the Type field.
- Fill the access URL for xml browser
- Press  or Save soft key to save the configuration

To configure the XML Browser via Web interface

- Click Function keys Line Key.
- Select the desired Key and select Xml Browser in the Type.
- Fill the access URL for xml browser (e.g.: `http://192.168.0.62/xmlbrowser/text.xml`)

- Click  button to save the configuration.

The screenshot shows the Axtel web interface with a navigation menu (Home, Profile, Account, Network, Function Keys, Setting, Directory, Management) and a 'logout' link. On the left, there are buttons for 'Line Key', 'Programmable Key', and 'EXP KEY'. The main area contains configuration fields for 'Line Label Length', 'Line Page Indicator', 'BLF list MODE', 'line key as cancel', and 'BLF blink'. Below these is a table with columns: Line, Type, Mode, Value, Label, Account, and Extension. The 'Key2' row is highlighted with a red box, showing 'XML Browser' as the Type, 'Default' as the Mode, and 'http://192.1' as the Value.

Broadsoft Group

When using the BroadSoft Group feature, by just pressing the key you can enter the Broadsoft Contacts interface quickly.

To configure the Broadsoft Group via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  key to select the Broadsoft Group in the Type field.
- Press  or Save soft key to save the configuration

To configure the Broadsoft Group via Web interface

- Click Function keys Line Key.
- Select the desired Key and select Broadsoft Group in the Type.
- Click the  button to save the configuration.

Conference

The Axtel IP Phone supports up to 5-way conference. You are allowed to configure the programmable key to be used as a conference key. This key

works same as .

To configure the Conference via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  key to select the Conference in the Type field.
- Press  or Save soft key to save the configuration

To configure Conference via Web interface

- Click Function keys Line Key.
- Select the desired Key and select Conference in the Type.
- Click the  button to save the configuration.

Forward

If the key is configured as Forward key, press this key under the idle status, the IP phone will turn to the Always Forward interface and you can set the Forward to number, then when there is any call to the number will be forwarded to the set number automatically.

To configure the Forward via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  key to select the Forward in the Type field.
- Enter the Number to forward to.
- Press  or Save soft key to save the configuration

To configure Forward via Web interface

- Click Function keys Line Key.
- Select the desired Key and select Forward in the Type.
- Enter the Value with the number you want to forward to.
- Click the  button to save the configuration.

Transfer

You are able to configure the key as a transfer key to perform the Blind/Attended/ Semi-Attended Transfer.

To configure the Transfer via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  key to select the Transfer in the Type field.
3. Enter the Number to transfer to
4. Press  or Save soft key to save the configuration

To configure Transfer via Web interface

1. Click Function keys Line Key.
2. Select the desired Key and select Transfer in the Type.
3. Enter the Value with the number that wanted transfer to
4. Click the  button to save the configuration.

Hold

The key can be configured as a hold key. You can use this key to hold and resume a call during the conversation.

To configure the Hold via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  key to select the Hold in the Type field.
3. Press  or Save soft key to save the configuration

To configure Hold via Web interface

1. Click Function keys Line Key.
2. Select the desired Key and select Hold in the Type.
3. Click the  button to save the configuration.

Group Listening

With this feature, when you have an active call, you can listen using Handset and Free-speaker, but only can use the handset to speak.

To configure the Group listening via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  key to select the Group Listening in the Type field.
3. Press  or Save soft key to save the configuration

To configure Group listening via Web interface

1. Click Function keys Line Key.
2. Select the desired Key and select Group Listening in the Type.
3. Click the  button to save the configuration.

DND

If the key is configured as DND key, allows you to activate the DND function immediately when you press it and the phone will reject all incoming calls automatically. Press it again to deactivate DND mode.

To configure the DND via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  key to select the DND in the Type field.
3. Press  or Save soft key to save the configuration

To configure DND via Web interface

1. Click Function keys Line Key.

2. Select the desired Key and select DND in the Type.
3. Click the  button to save the configuration.

To enable DND feature

Press the DND soft key when the phone is idle status, and then DND icon shown on the LCD.

To disable DND feature

Press the DND soft key again, and then there is no DND icon on the LCD.

Redial

If the key is configured as Redial key, you can redial the last placed call from the IP Phone.

To configure Redial via Web interface

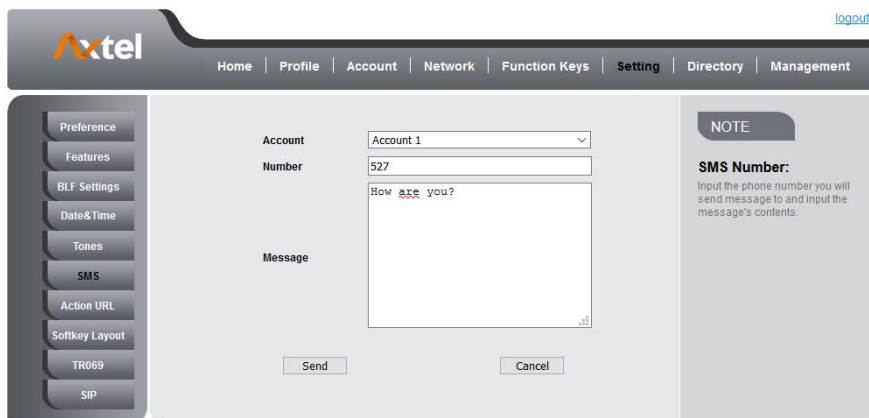

1. Click Function keys Line Key
2. Select the desired Key and select Redial in the Type.
3. Enter the Label displayed on LCD.
4. Click the  button to save the configuration.

SMS

Send SMS

To send SMS via web Interface

1. Click Setting SMS
2. Select the Account(from which account the SMS sent)
3. Enter the target number
4. Input the content of SMS, and click Send.

To send SMS via Phone interface:

1. Click Menu Messages Text Message Set SMS
2. Enter the contents in the blank field.
3. Press the Send button
4. Select the account in the From field (from which account the SMS sent)
5. Enter the target number in the To field (to which account the number sent)
6. Press the Send button.

Set SMS Line Key

To configure the SMS via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  key to select the SMS in the Type field.
3. Press  or Save soft key to save the configuration

To configure SMS via Web interface

1. Click Function keys Line Key.
2. Select the desired Key and select SMS in the Type.
3. Click the  button to save the configuration.

Record

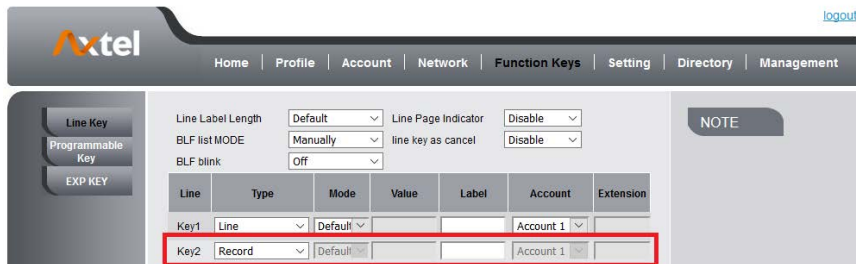

With record feature, you can record your calls by pressing the record key .

To configure the record via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  or press Switch soft key to select the Record in the Type field.
3. Press  or Save soft key to save the configuration

To configure the record via Web interface

1. Click Function keys Line Key.
2. Select the desired Line Key and select Record in the Type.
3. Click the  button to save the configuration.

The screenshot shows the Axtel web interface with a navigation menu at the top: Home | Profile | Account | Network | Function Keys | Setting | Directory | Management. A 'logout' link is in the top right. On the left, there is a sidebar with 'Line Key', 'Programmable Key', and 'EXP KEY' options. The main content area has several dropdown menus: 'Line Label Length' (Default), 'Line Page Indicator' (Disable), 'BLF list MODE' (Manually), 'line key as cancel' (Disable), and 'BLF blink' (Off). Below these is a table with columns: Line, Type, Mode, Value, Label, Account, and Extension. The table has two rows: 'Key1' with 'Line' type and 'Account 1' account, and 'Key2' with 'Record' type and 'Account 1' account. The 'Key2' row is highlighted with a red border.

Note:
Please contact the system administrator whether support this feature or not.

URL Record

The phone sends HTTP URL request to trigger a recording. Contact your system administrator for the predefined URL.

To configure the URL record via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  key to select the URL Record in the Type field.
3. Press  or Save soft key to save the configuration

To configure the record via Web interface

1. Click Function keys Line Key.
2. Select the desired Line Key and select URL Record in the Type.
3. Fill the Value.
4. Click the  button to save the configuration.

Paging

With this feature, you can call a paging group directly.

To configure the paging via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  or press Switch soft key to select the Paging in the Type field.
3. Enter the paging code followed the number.
4. Press  and  key to select the Account ID.
5. Press  or Save soft key to save the configuration

To configure the Paging via Web interface

1. Click Function keys Line Key.
2. Select the desired Line Key and select Paging in the Type.
3. Enter the paging code followed the number.
4. Select the Account.

- Click the  button to save the configuration.

Shared Line

Axtel IP Phone supports "Share Call Appearance" by Broadsoft and XCast standard. This feature allows members of the SCA group to shared SIP lines and provides status monitoring (idle, active, progressing, hold) of the shared line. When there is an incoming call designated for the SCA group, all of the members of the group will be notified of an incoming call and will be able to answer the call from the phone with the SCA extension registered in the group. All the users that belong to the same SCA group will be notified by visual indicator when a user seizes the line and places an outgoing call, and all the users of this group will not be able to seize the line until the line goes back to an idle state or when the call is placed on hold (with the exception of when multiple call appearances are enabled on the server side).

In the middle of the conversation, there are two types of hold: Public Hold and Private Hold. When a member of the group places the call on public hold, the other users of the SCA group will be notified of this by the red-flashing button and they will be able to resume the call from their phone by pressing the line button. However, if this call is placed on private-hold, no other member of the SCA group will be able to resume that call.

To enable share call appearance, the user would need to register the share line account on the phone. In addition, they would need to navigate to "Account" "Advanced" on the webpage and set the line to "Share Line" and "SIP Server Type", and configure the line key or Line Key as "line" type with the desired account on webpage or LCD. If the user requires more share call appearances, the user can configure multiple line keys (Function keysLine key) to be "line" type associated with the account.

This feature is very useful in the boss and secretary scenario. For example, the secretary can share the boss' extension number on her phone. When there is an incoming call to the extension number of the boss, both the phones of the boss and the secretary will ring simultaneously. Either the boss or the secretary can answer the call. Calls on share line can be placed on hold or barged in.

To configure the line key as line via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  key to select the Line in the Type field.
- Press  and  key to select the Account ID.
- Enter the Label
- Enter the Value
- Press  or Save soft key to save the configuration

To configure the line key as line via Web interface

- Click Function keys Line Key.
- Select the desired Line Key and select Line in the Type.
- Enter the Value.
- Enter the Label.
- Select the Account
- Click the  button to save the configuration and then restart.

Note:

This feature is not available on all servers. For more information, contact your system administrator.

Public Hold

The key can be configured as a public hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold or resume a call.

To configure the Public hold via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  key to select the Public Hold in the Type field.
- Press  or Save soft key to save the configuration

To configure public hold via Web interface

- Click Function keys Line Key.
- Select the desired Key and select Public Hold in the Type.

- Click the  button to save the configuration.

Private Hold

The key can be configured as a private hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold the call, but only the initiator can resume the call.

To configure the Private hold via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  key to select the Private Hold in the Type field.
- Press  or Save soft key to save the configuration

To configure private hold via Web interface

- Click Function keys Line Key.
- Select the desired Key and select Private Hold in the Type.
- Click the  button to save the configuration.

Hot Desking

Hot Desking originates from the definition of being the temporary physical occupant of a work station or surface by a particular employee. A primary motivation for Hot Desking is cost reduction. This feature is regularly used in places where all employees are not in the office at the same time, or not in the office for a very long time, which means their personal offices are often vacant, consuming valuable space and resources.

You can use Hot Desking on the IP phone to logout the existing accounts and then log in a new account, which allows many users to share the phone resource in different times. To use this feature, first you need to configure a Hot Desking key in the advance settings.

To configure the hot desking via Phone interface

- Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
- Press  and  or press  key to select the Hot Desking in the Type field.
- Enter the display name in the Label field.
- Press  or Save soft key to save the configuration

To configure the hot desking via Web interface:

- Click Function keys Line Key.
- Select the desired Key and select Hot Desking in the Type.
- Select the desired account from the pull-down list of Account field.
- Click the  button to save the configuration.

To use the Hot desking feature on the user interface:

- Press the Hot Desking key when the IP Phone is idle.

2. Enter the Extension number and password

1. User Name: 532
 2. Password: *****
 Cancel abc Delete Save

3. Click Save soft key

You can see the account information which has changed.

Note:
 This feature is not available on all servers. For more information, contact your system administrator.

ACD

ACD feature is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of the different personnel at the earliest point. The ACD feature on the Axtel IP Phone allows the ACD system to distribute calls from large volumes of incoming calls to the registered IP phone users. To use this feature, first you should configure an ACD key in the advance settings.

To configure the ACD via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  or press  key to select the ACD in the Type field.
3. Enter the label in the Label field.
4. Select the desired account in the Account ID field.
5. Press  or Save soft key to save the configuration

To configure the ACD via Web interface:

1. Click Function keys Line Key.
2. Select the desired Key and select ACD in the Type.
3. Enter the label in the Label field.
4. Select the desired account from the pull-down list of Account field.
5. Click the  button to save the configuration.

Note:
 This feature is not available on all servers. For more information, contact your system administrator.

Zero Touch

You can use this key feature to configure auto provision and network parameters quickly.

To configure the zero touch via Phone interface

1. Press Menu Features Function Keys Line Keys as Function Keys Line Key2(for example)
2. Press  and  or press  key to select the Zero Touch in the Type field.
3. Press  or Save soft key to save the configuration

To configure the zero touch via Web interface:

1. Click Function keys Line Key.
2. Select the desired Key and select Zero Touch in the Type.
3. Click the  button to save the configuration.

To use the zero touch feature on the user interface:

1. Press the Zero Touch key when the IP Phone is idle.
2. Press the OK soft key and the IP Phone will enter the WAN Port interface; you can change the WAN Type by pressing the Navigation keys.
3. Press the Next soft key to enter Network interface, then you can configure some information.
4. Press the Next soft key again, you can configure auto provision information.
5. When you finish the setting, you can press the OK to accept the changes.

Note:
 This feature is not available on all servers. For more information, contact your system administrator.

Multicast Paging

You can use multicast paging to quickly and easily forward out time sensitive announcements to people within the multicast group. You can configure a multicast paging key or a paging list key on the phone, which allows you to send a Real Time Transport Protocol (RTP) stream to the pre-configured multicast address(es) without involving SIP signaling. You can configure the phone to receive an RTP stream from pre-configured multicast listening address(es) without involving SIP signaling. You can specify up to 10 multicast listening addresses.

Sending RTP Stream

To configure a multicast paging key via Phone interface

1. Press Menu Features line or Line Key Line Key2(e.g.)
2. Press  and  or Switch key to select the Multicast Paging in the Type field.
3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value field.
The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.
4. Press  or Save soft key to save the configuration

To configure a multicast paging key via Web interface

1. Function keysLine key:
2. Select the desired Key and select Multicast Paging in the Type.
3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value field.
The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.
4. Click the  button to save the configuration.

Sending RTP Stream:

Press the multicast paging key when the phone is idle.

The phone sends RTP to a preconfigured multicast address (IP: Port). Any phone in the local network then listens to the RTP on the preconfigured multicast address (IP:Port). For both sending and receiving of the multicast RTP, there is no SIP signaling involved.

The multicast paging key LED illuminates solid green.

Receiving RTP Stream

You can configure the phone to receive a Real Time Transport Protocol (RTP) stream from the pre-configured multicast address(es) without involving SIP signaling. You can specify up to 10 multicast addresses that the phone listens to on the network. How the phone handles incoming multicast paging calls depends on Paging Barge and Paging Priority Active parameters configured via web user interface.

Paging Barge

The paging barge parameter defines the priority of the voice call in progress. If the priority of an incoming multicast paging call is lower than that of the active call, it will be ignored automatically. If Disabled is selected from the pull-down list of Paging Barge, the voice call in progress will take precedence over all incoming multicast paging calls.

Valid values in the Paging Barge field:

- 1 to 10: Define the priority of the active call, 1 with the highest priority, 10 with the lowest.
- Disabled: The voice call in progress will take precedence over all incoming paging calls.

Paging Priority Active

The paging priority active parameter decides how the phone handles incoming multicast paging calls when there is already a multicast paging call on the phone. If enabled, the phone will ignore incoming multicast paging calls with lower priorities, otherwise, the phone will answer incoming multicast paging calls automatically and place the previous multicast paging call on hold. If disabled, the phone will automatically ignore all incoming multicast paging calls.

Multicast Codec:

You can only configure the codec by Web interface.

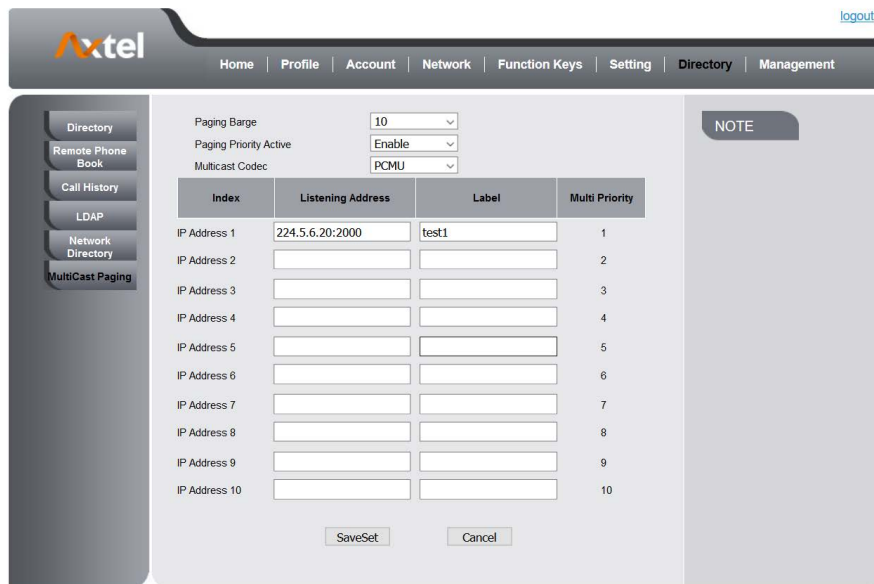

To configure multicast codec key via Web interface

1. Click Directory Multicast Paging:
2. Select the desired codec from the pull-down list of Multicast Codec
3. Click the  button to save the configuration.

To configure multicast listening addresses via Web interface:

1. Click DirectoryMulticast Paging
2. Select the desired value from the pull-down list of Paging Barge.
3. Select the desired value from the pull-down list of Paging Priority Active.
4. Enter the multicast IP address(es) and port number (e.g., 224.5.6.20:2000) which the phone listens to for incoming RTP multicast in the Listening Address field.
5. Enter the label in the Label field.

6. Click  button to save the configuration.

Index	Listening Address	Label	Multi Priority
IP Address 1	224.5.6.20:2000	test1	1
IP Address 2			2
IP Address 3			3
IP Address 4			4
IP Address 5			5
IP Address 6			6
IP Address 7			7
IP Address 8			8
IP Address 9			9
IP Address 10			10

Note:
The priorities of listening to multicasting addresses can be predefined: 1 being the highest priority, 10 with the lowest in priority order. Both the multicast paging sender and receiver's phones play a warning tone when establishing a multicast paging call. Listening to Multicasting addresses can be configurable via Web interface only.

Upgrade

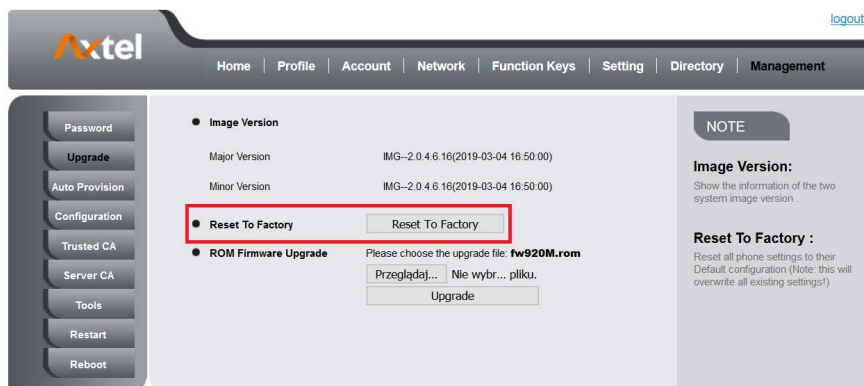

Factory Reset

To set Factory Reset by Phone interface

1. Press Menu Settings Advanced Setting(default password: admin) Phone Setting Factory Reset
2. Press OK soft key in the warning page.

To Reset to Factory via Web interface

1. Click Management Upgrade
2. Click  and then confirm the setting.

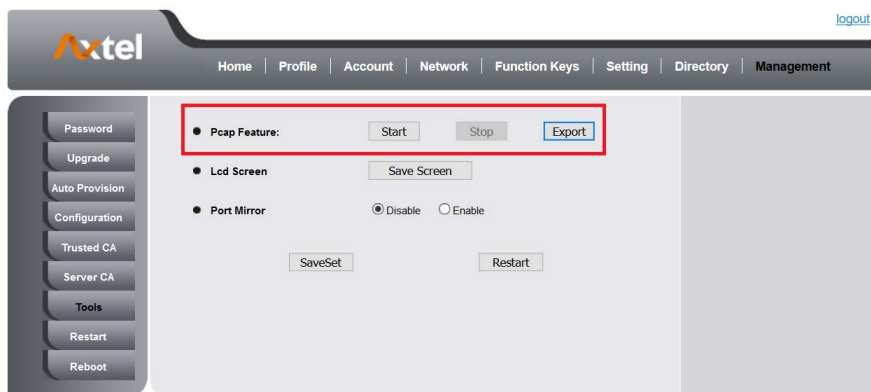

Pcap Feature

To use pcap via Web interface:

1. Click Management Tools
2. Click Start and then operation the phone
3. When finish the operation, click Stop and then click Export.

4. Then you'll get the Pacp captures.

System Log

To download system log via Web interface:

1. Click Management Configuration
2. Click  of the system Log

3. Then you'll get a txt file: syslog.tgz.

Upgrade

To upgrade via HTTP, the "Management" "auto provision" " Firmware Upgrade" "Upgrade Mode" field needs to be set to HTTP, respectively. "Firmware Server Path" needs to be set to a valid URL of a HTTP server, server name can be in either FQDN or IP address format. Here are examples of some valid URL.

e.g. firmware.mycompany.com:5688/Axtel
e.g. www.mycompany.com:5688/fm/Axtel
e.g. 218.2.83.110

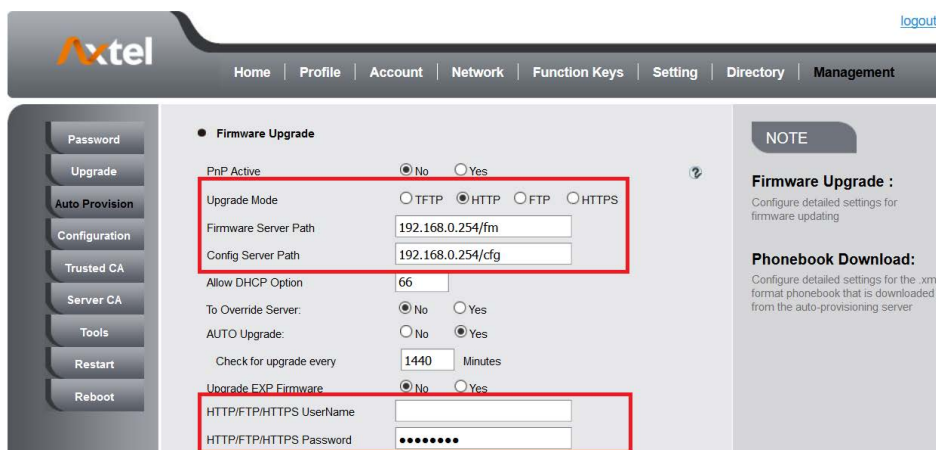

Instructions for firmware upgrade via HTTP:

- (1) End users can choose to download the free HTTP server from <http://httpd.apache.org/> or use Microsoft IIS web server. Then setup HTTP server.
- (2) Unzip the firmware file and put all of them under the *root/fm* directory of the HTTP server.
- (3) Visiting "http://192.168.0.254/fm/fw920G.rom on localhost by browser" to verify the HTTP Server. If visiting "http://192.168.0.254/fm/fw920G.rom on another computer and it not prompted to download fw920.rom file on this computer, please check if the firewall is on or off (Suggest you turn off the firewall).

To configure the server path via Web interface:

1. Click Management Auto provision:
2. Select the upgrade mode in the Upgrade Mode field
3. Enter the Firmware Server Path and Config Server Path (192.168.0.254 is HTTP server).
4. Enter the HTTP server's username and password (optional).
5. Click the  button to save the configuration.

6. Restart the AX-300G, IP Phone will restart and auto-get firmware files from HTTP server.

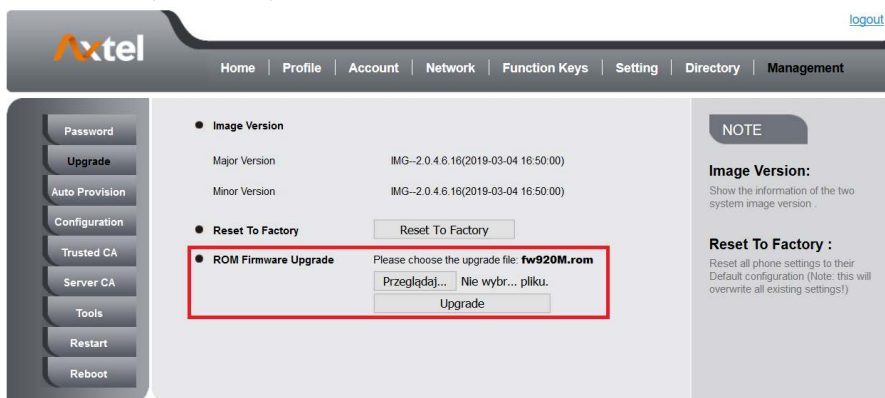

NOTES:

- Axtel recommends end-user use the Axtel HTTP server. For large companies, we recommend to maintain their own TFTP/HTTP/FTP/HTTPS server for upgrade and provisioning procedures.
- Once a "Firmware Server Path" is set, user needs to update the settings and restart the IP Phone. If the configured firmware server is found and a new code image is available, the AX-300G will attempt to retrieve the new image files by downloading them into the AX-300G's SDRAM. During this stage, the AX-300G's LEDs will blink fastly until the checking/downloading process is completed. Upon verification of checksum, the new code image will then be saved into the Flash. If TFTP/HTTP/FTP/HTTPS fails for any reason (e.g. TFTP/HTTP/FTP/HTTPS server is not responding, there are no code image files available for upgrade, or checksum test fails, etc), the AX-300G will stop the TFTP/HTTP/FTP/HTTPS process and simply boot using the existing code image in the flash.
- Firmware upgrade may take as long as 3 to 8 minutes over Internet, or just 1 minutes if it is performed on a LAN. It is recommended to conduct firmware upgrade in a controlled LAN environment if possible. For users who do not have a local firmware upgrade server.
- Axtel's latest firmware is available at www.axtelphones.com Support Document & Firmware.
- Oversea users are strongly recommended to download the binary files and upgrade firmware locally in a controlled LAN environment.

To upgrade manually via the Web configuration interface

1. Click Management Upgrade
2. Click Management Upgrade
3. Click Choose file or the blank.
4. Select the firmware (fw920G.rom)and then click

Configuration File

1. Click Management Configuration Configure File

2. Click the **Download Xml File** or **Download Bin File**, then you can get a file: cfg.bin or cfg.xml

● **Configure File**

Download Device Xml Configuration	Download Xml File
Restore Xml Configuration	Choose file No file chosen Restore Xml Configuration
Download Device Bin Configuration	Download Bin File
Restore Bin Configuration	Choose file No file chosen Restore Bin Configuration
Download User Bin Configuration	Download User Bin File
Delete User Configuration	Delete User File

To Restore a configuration file:

1. Click Management Configuration Configure File

2. Select the xxx.bin or xxx.xml file, and then Click the **Restore Xml Configuration** or **Restore Bin Configuration**, then IP Phone will reboot.

● **Configure File**

Download Device Xml Configuration	Download Xml File
Restore Xml Configuration	Choose file No file chosen Restore Xml Configuration
Download Device Bin Configuration	Download Bin File
Restore Bin Configuration	Choose file No file chosen Restore Bin Configuration
Download User Bin Configuration	Download User Bin File
Delete User Configuration	Delete User File

Troubleshooting

Why is the phone LCD screen blank?

- Ensure your phone is properly plugged into a functional AC outlet.
- Ensure that the phone isn't plugged into a plug controlled by a switch that is off.
- If the phone is plugged into a power strip, try plugging it directly into a wall outlet instead.
- If your phone is powered from PoE, ensure you use a PoE compliant switch or hub, or contact your system administrator for more information.
- Check if the power LED is on to ensure that the phone is powered on.

Why does the phone display "Network Unavailable"?

To resolve:

- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is functioning well.
- If the problem still persists, contact your system administrator for more information.

Why can't I get a dial tone?

To resolve:

- Check for any loose connections and that the phone has been installed properly. For the Installation instructions, refer to the phone installation section.
- Check whether dial tone is present on one of the audio modes.
- Switch between the Handset, Headset (if you have) or Hands-Free Speakerphone to check whether dial tone is present for one of the audio modes.
- If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.

Where to set the tone?

You can set the tone on Web interface:

- Click Setting Tones
- Define the dial tone, ringing, busy tone...
- For the tones, you can check with your system administrator.
- For more Click [Configure Ring Tones](#).

The screenshot shows the Axtel web interface. The top navigation bar includes 'Home', 'Profile', 'Account', 'Network', 'Function Keys', 'Setting', 'Directory', and 'Management'. The 'Setting' page is active, and the 'Tones' option is selected in the left sidebar. The main content area contains the following fields:

Select Country	Custom
Dial Tone	f1=350@-13,f2=440@-13,c=0/0;
Ringback Tone	f1=440@-19,f2=480@-19,c=2000/4000;
Busy Tone	f1=480@-24,f2=620@-24,c=500/500;
Reorder Tone	f1=480@-24,f2=620@-24,c=250/250;
Confirmation Tone	f1=350@-11,f2=440@-11,c=100/100-100/100-100/100;
Call Waiting Tone	f1=440@-13,c=300/10000-300/10000-0/0;

Syntax: f1=freq@vol, f2=freq@vol, c=on1/off1-on2/off2-on3/off3; [...]
Note: freq: 0 - 4000Hz; vol: -30 - 0dBm

Buttons: SaveSet, Cancel

NOTE
Select Country:
Select your country to generate the standard call tones. Or select Custom to customize the call tones.

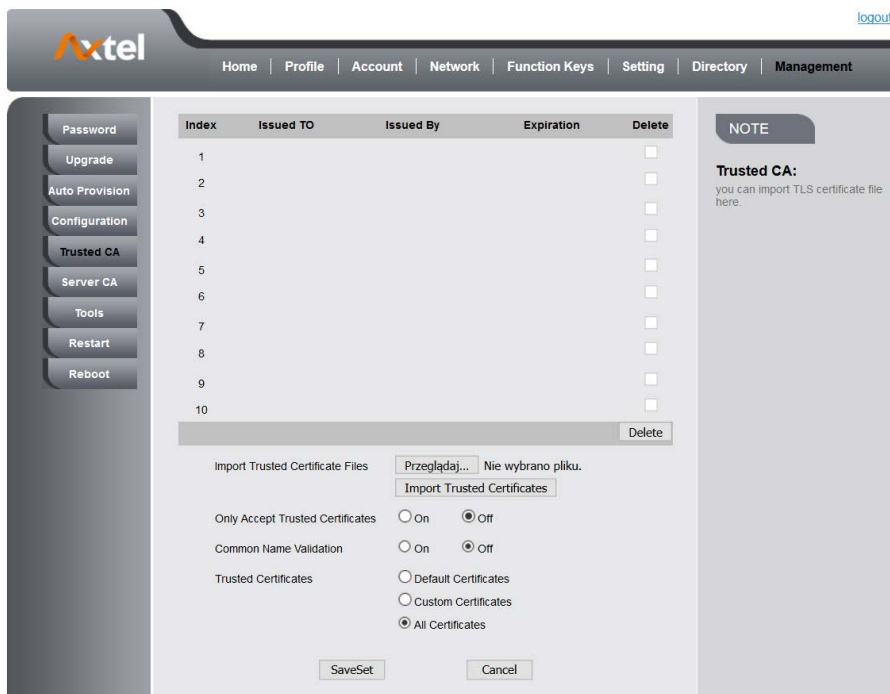

How to download XML Configuration?

- Click Management Configuration

Download Xml File

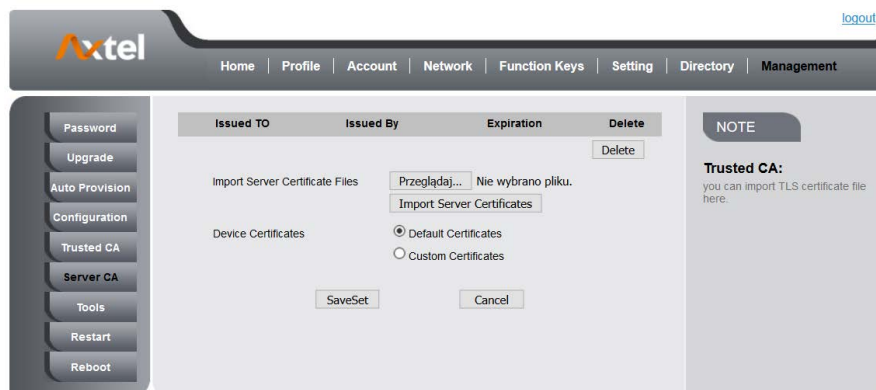

How to Import Trusted CA certificate?

- Click Management Trusted CA

How to Import Server CA certificate?

- Click Management Server CA

How to use LLDP?

- For LLDP information, please click [VLAN](#)
- VLAN Notes including:
 1. Voice VLAN
 2. Major Benefits of Using VLANs
 3. VLAN discovery method on Axtel IP Phones
